Snoqualmie Valley Health Swing Bed Program Earns Exemplary Provider Certification

SNOQUALMIE, WA – Snoqualmie Valley Health (SVH) is proud to announce the hospital's Swing Bed Program has been officially certified by The Compliance Team, recognizing SVH's commitment to providing high-quality transitional care to patients. This prestigious certification underscores the organization's dedication to meeting and exceeding national standards for excellence in healthcare services.

"As your Public Hospital District, SVH is immensely proud to have earned the prestigious Exemplary Provider® accreditation. This highlights the exceptional care and dedication our team delivers to the Snoqualmie Valley community. I extend my gratitude and congratulate our entire team of caregivers for their relentless dedication to our patients. Their exceptional care, ensuring patients thrive each and every day, has made this possible," shared CEO, Renée K. Jensen.

The Compliance Team's Swing Bed Certification is awarded to healthcare organizations that demonstrate superior patient care, adherence to safety protocols and a commitment to continuous improvement. This certification process involves a rigorous on-site survey of our program's policies, procedures, and outcomes to ensure we deliver exceptional care during patients' transition from acute care to home or other long-term care settings.

"This team has much to be proud of. This was a rigorous accreditation process; the survey covered many elements of performance. A tremendous thank you to all team members involved in preparation for this achievement," said Cecelia Tapp, CPHQ, Director of Quality, Risk and Compliance.

SVH's Swing Bed Program offers comprehensive skilled nursing care and personalized rehabilitation services, including physical, occupational, speech and recreational therapy. Our experienced multidisciplinary team provides 24/7 medical attention and support, facilitating a smooth transition from acute hospital care to home or another long-term care setting.

The Swing Bed Program emphasizes active patient and family involvement, patient education, and a holistic approach to care that addresses the physical, emotional, and social aspects of recovery. By providing continuous medical attention and comprehensive support, our Swing Bed Program aims to reduce the risk of readmission and promote successful, independent recovery.
